Career Objective

I am passionate about **Computer Science** and love developing complete, real-world applications. With a strong focus on **Full Stack Development** and **Android app development**, I enjoy building responsive and user-friendly solutions that combine both frontend and backend excellence. I thrive on learning new technologies like **React.js**, **Node.js**, and **MongoDB**, and I'm driven by a desire to grow through hands-on project experience.

Education

B.Tech in Computer Science

Expected: Apr 2026

Rajiv Gandhi University of Knowledge Technologies, Srikakulam

Pre-University CGPA: 9.39 — Current CGPA: 8.6

High School – SSC

Completed: Mar 2020

Z.P High School, Manyapurtla

CGPA: 10

Technical Skills

Frontend: HTML, CSS, JavaScript, React.js, Redux, Bootstrap, Tailwind CSS, Blazor (Basics)

Backend: Node.js, Express.js, Firebase, REST APIs, JWT, .NET

Databases: MongoDB, MySQL

Mobile: Java (Android), Firebase ML Kit

Programming Languages: Java, C, C#, JavaScript

Tools: Git, GitHub, Postman, VS Code, Android Studio

Experience

Android Development Intern

May 2025 – July 2025

Naipunyam (APSSDC)

- Developed a real-time **Language Translator Android App** using **Java** and **Firebase ML Kit**.
 - Integrated **Text Recognition**, **Language Identification**, and **Translation** features with smooth UI and proper state handling.
 - Designed a user-friendly interface using **Android Studio**, following clean architecture principles.
 - Applied real-time **cloud-based ML APIs** for efficient language processing and **offline translation** support.
 - Enhanced user experience with **performance optimization** and robust **error handling**.
-

Projects

- **Food Delivery App**
Developed a complete **MERN stack** app with secure login/signup, vendor product management, and real-time ordering. Used **JWT** for auth and **Bcrypt** for password hashing.
 [Source Code](#)
 - **Job Portal Website**
Job matching platform using **Redux** for state management. Matches resume data with job descriptions and scores accordingly.
 [Source Code](#)
 - **Language Translator App (Android)**
Built using **Java** and **Firestore ML Kit**, includes text recognition, language ID, and translation.
 [Source Code](#)
 - **React Hooks Projects – Component Library**
Built multiple components using `useState`, `useEffect` like Accordion, Star Rating, Load More, QR Generator, Tabs, etc.
 [Live Demo](#)
 - **Blazor Weather App (C#, HTML)**
Developed a weather app using **Blazor WebAssembly** and .NET 8. Integrated weather APIs and Razor components for live forecasts.
-

Certificates

Frontend:

- Introduction to Front-End Development – *Simplilearn*, 18 June 2024
- Build Your First Project with React – *IBM*, 24 April 2024

Backend:

- Build Your First Node.js App – *24 April 2024*
 - Introduction to Node.js – *24 April 2024*
 - RESTful API and Express – *April 2024*
 - NoSQL Database Basics – *IBM*, 24 April 2024
 - Introduction to SQL – *24 April 2024*
-

Achievements

- Solved 300+ DSA problems on LeetCode.
- Certified in NPTEL DSA.
- Built multiple full-stack projects with modern tech stacks – see GitHub.
